Treatment Beds and Multifunction Treatment Units

# Made in Germany

To ensure that we do justice to the „Made by Gharieni“ label, we keep to the principle of „quality without compromise“. This also entails a guarantee of quality, as only this can offer customers transparency and security to the same level. To provide you with clear facts with regard to the proof of origin and to demonstrate that social responsibility and consumer interests are of great importance to us, we have undergone a costly certification process by TÜV NORD, and since early 2012 it has been „official“: in accordance with the TÜV NORD test criteria, our treatment beds and multifunction treatment

units are now able to display the „Made in Germany“ seal! Our manufacturing and administration processes are of course subject to constant quality checks. The comprehensive quality management of our business processes has been in place for over ten years now, and includes the ISO 9001 and ISO 13485 certifications. As a customer, this guarantees you quality of product and equally excellent service – a combination that is otherwise very hard to find!

# Make the right decision!

What is characteristic about a good podiatry chair? Besides individual aspects, some „basics“ are required which should be part of each treatment bed.

- The height for getting on and off is an important aspect for your short and physically handicapped customers; hence the low height should not exceed 55 cm (21.7 in).
- Modern treatment beds/ podiatry chairs are equipped with an entry/exit aid; that means, the seat will only incline slightly when entering/leaving the treatment bed/ podiatry chair.
- You should sit and stand alternately while working, so you will take care of your back and leg veins. Therefore, the minimum working height (on the heels) should be 120 cm (47.2 in) (ideally 140 cm (55.1 in)). While working, the seat is inclined rearwards, so that the body's centre of gravity is shifted. Moreover, your customer can sit more comfortably. This adjustment of the podiatry chair also provides optimal view to the plantar surface contact area of the feet while working in seated position.
- A podiatry chair must also be suitable for your heavy patients; so a good treatment chair has a proofed elevating force and load capacity of the sitting surface of 160 kg (352 lbs). Including an additional safety margin, the lifting capacity is 200 kg (440 lbs).

• You should also pay attention for the stability of the podiatry chair. Only sufficient dimensions of the substructure ensure safety against overturning of the chair.

- Furthermore, the casing of the base as well as the back of the podiatry chair should be designed easy-to-clean so they always are completely hygienic.
- Up-to-date treatment beds/podiatry chairs are equipped with motors so your back is not any longer stressed by adjusting in bended position. The minimum equipment includes two motors for automatic adjustment of the height and inclination; - besides, your customer will enjoy a permanent comfortable and ergonomic sitting position only if these two motors operate synchronously.
- Comfort-treatment beds are equipped with three additional motors which allow you to control (steplessly-adjustable) the backrest as well as the left and the right leg rest. The wireless hand control panel and the foot control panel make the motors easy to control when you want to work with your hands free. Always ensure that the control panels are easy to operate. Moreover, memory positions of treatment positions can be programmed/recalled via the foot control panel. Relevant functions are a useful alternative from three motors up. The freely selectable memory positions you can set in this way will also make daily tasks easier.

• Treatment beds provide more safety for elderly customers when actuators are programmed in such a way, that the treatment bed is lowered at the end of treatment, then adjusted in horizontal seat position and finally the exit support is activated.

- Podiatry chairs with two kinds of upholsteries are available on the market: Upholsteries with and without seams. Seamed upholsteries are generally thicker, partially softer and more comfortable. Which kind of upholstery you choose should depend on the kind of foot care (rather cosmetic or rather medical type). Upholsteries without seams are - unequivocally - easier and more efficiently to disinfect so they are mandatory for the podiatric praxis due to hygiene reasons.
- In addition to the standard features of podiatry chairs, many other extras are offered which allows you to „customise“ your podiatry chair according to the requests and needs of your customers.
- Laterally pivoting leg rests: To provide optimal treatment, the leg rests should be pivotable up to 90° to the outside, so you have sufficient moving space during treatment.
- Seat depth adjustment: The seat depth adjustment offers your patients greater seating comfort - regardless on the length of their legs - and, furthermore, the operator optimum comfort and ergonomics.

- Length-adjustable foot rests: These foot rests provide a sitting comfort which is independent of the size of your patients.

- Inclined headrest: Would you like to provide your customers with a more comfortable sitting (and the possibility of watching) during the treatment? A headrest which can be inclined forwards helps to support the posture of the head and avoids muscle tension. Complementary, an easy-to-install and removable neck cushion, which supports the cervical spine, is available for some podiatry chairs.

- Laterally pivoting armrests: Especially elderly people with limited mobility can enter a podiatry chair, which is equipped with these armrests, more easily. It is also important that the armrest can be tilted backwards by 180° when you want to transform your treatment chair into a massage couch.

- Mountable collecting vessels and storage shelves enable more efficient and clean working procedures.

- Rotate function: A chair-axle with rotate function enables you to turn the complete structure of the podiatry chair (and the patient) via the foot lever or by hand in any desired direction; you can also lock the position when required. This function is very useful when offering many different treatments such as foot reflexology, paraffin treatment, etc.

- What should your treatment chair provide? Is it used for foot care only? Or would you like to offer additional treatments such as massages, reflex zone therapy of the feet or cosmetic applications? In such a case, the treatment chair must be transformable into a treatment bed. Or do you want to use the treatment bed for wellness-applications mainly and for foot care only occasionally? In such a case a spa table with removable footrest is recommended so that you have free access to the feet of your customer from all sides. If you want to use the treatment chair as a massage couch, make sure that the headrest is equipped with an extendable segment or an opening for the nose to ensure that your customer, when treated in prone position, can breathe unhindered.

In addition, there are some more aspects to consider:

- Size of the treatment room: Would it be best for you to choose a space-saving model? Or should it not be a problem for you to place a large (and therefore generally more comfortable) podiatric treatment bed in your treatment room?

- Periphery of the praxis: Do you have demanding customers mainly, e.g. in a large modern city? Do you have to prevail against the competition? In such a case there are many reasons to invest in a more „luxurious“ model.

- But your praxis may also be situated in an area with low purchasing power or patients, who are interested in purposeful foot care only. In such a case you can dispense with some equipment-extras.

# Options

## Upholstery

### Airback

This ergonomic Lordosis support system is filled with air by hand pump (on some models also electrically or as triple version). Particularly during long treatments or at customers with back complaints „Airback“ is appreciated.

### Smart-Thermo

The intelligent Smart-Thermo heating system is integrated into the cushion of the couch and works with modern micro-processor technology. During the start-up phase, it heats with full power to achieve a comfortable temperature on the surface as soon as possible. Then, it is kept constant until the safety switch automatically turns off the heating after a predefined time. The variable parameters are adjustable via a programming sequence, which is initiated by a certain key combination. The Smart-Thermo heating system works with direct current and is therefore virtually free of electro-smog.

### Vibro-Wellness

Vibro-Wellness is a pleasantly massaging vibration system. 6 or 10 different vibration motors in the upholstery can be controlled individually via a manual switch and work on shoulder (back part), seat and calves. The vibration intensity can be individually adjusted.

### Your Logo

Couches with this option can be branded with your personal logo on upholstery or neck rest.

### Coloured Upholstery

Our treatment beds SPL, LR, SLR and all beds with XP-upholstery are available in two or three different colours on one upholstery. You can choose your favourite colour from our palette in the cover of this catalogue.

## Headrest

### XL Extension

This sophisticated alternative to the traditional head rest enables an individual adjustment to each customer: just remove the standard headrest and replace with the XL extension. Thus slim and stout people can be treated ergonomically optimized. Especially in the massage position the XL extension provides a good support for the arms. Of course, the XL extension is also adjustable by simply pulling out. Available for SLXP and SPL also with nose slot!

### Multifunctional Mounting for Removable Headrests

This special headrest mounting enables with its double hinge system a variety of individual settings that are impossible to achieve with an ordinary headrest. This allows, in conjunction with the optional head parts, nearly every conceivable treatment at the head. Without headrest.

### Crescent Headrest

The curved headrest made from soft, washable polyurethane, is optimal in cosmetic treatments, because there are only minimal points of contact between head rest and customer. Thus there is a better access at the neck and shoulder area. During treatment the client's head is firmly fixed in stable position. Can only be used in connection with the multi functional holder. Ideal for permanent make-up and chiropody/ podiatry!

- |                   |                             |       |

| <b>Art. 48005</b> | synthetic leather cover     | ,-,-- |
| <b>Art. 75236</b> | disposable cover, 10 pieces | ,-,-- |

### U-shaped headrest

Soft cushion, related with washable artificial leather. Can only be used in with the multi functional holder headrest. Ideal for back massage!

- |                   |             |       |
|-------------------|-------------|-------|
| <b>Art. 48001</b> | headrest    | ,-,-- |
| <b>Art. 45018</b> | terry cover | ,-,-- |

### Neck Rest Dentalax

This headrest effectively supports the the cervical spine during treatment. Depending on the treatment bed, the Dentalax is available in different variations, for example as magnetic variation with medical treatment beds or adapted to the cushion material. By default available in white, the Dentalax can be optionally adapted to the colour of the treatment bed (available colours: see colour chart).

### Audio-Relax-Headrest

With integrated MP3 player in the XP-upholstery. The side speakers guarantee a pleasant relaxing sound experience with greatest comfort. The device itself is located outside of the pad so it is easy to use at all times. With 50 minutes of GEMA-free relaxation music.

## Basis

### Rotonde

The Rotonde function enables rotation of the bed to left or right to a total 330°. Due to this rotation, the customer can be placed easily in the ideal position during treatment. The laterally mounted lever can be easily accessed to lock or unlock the turning function of the seat. Our hydraulic models allow a rotation of 360°.

### Colours Casing

Coloured casing up to three different variants available: white, grey or in titanium finish. Colour selection depending on model.

### Special colours metal parts

Special paint of metal parts in RAL-colours on these models possible. The colours titan (RAL 9007), black-brown and white are included in the price.

### WoodDecor

This WoodDecor - by default in the wengé-look or in white available - gives your treatment table the right look to our wellness line. You are able to choose your favorite decor, perfectly matching the style of your room. Ask for our current chart of decor range!

### Castors

Set of 4 grey, easystop castors with soft tread, suitable for hard and soft floors.

Mechanically controlled at Gharieni med, SLR (standard) electrically controlled LR

### Foot Switch

Depending on bed model many of the functions can be controlled by feet. Thus both hands are free for the treatment. With the memory foot switch all motors can be controlled separately or even memory positions can be programmed and recalled.

### IR Hand-Held Remote Control

For wireless operating of selected Gharieni bed models, such as SLS Podo.

### Safety Function Spline

Spline eliminates the risk of crushing by electric recline adjustment, is used for all necessary actuators.

### Override Function

The new gas spring technology BLOC-O-LIFT® with override function enables an adjustment of gas pressure-supported bed parts in pulling direction of the gas spring, without the operation of the release lever.

### Individual variety

Many customers want to design their treatment rooms individually according to their personal taste. For this reason, with its wide range of wood décors, Gharieni can offer you the possibility of adapting your cabins, beds and devices to your ambience.

Through wood or colour applications, for instance, it is possible for certain treatment towers, beds and equipment trolleys to be with each other which therefore combine to form a single unit.  
Use the possibility of your personal cabin!

UPHOLSTERY COLOURS

## Gharieni Colour Chart

### PU-Upholstery

### Synthetic Leather

## Serge Ferrari Colour Chart

### „Stamskin® Top“ Synthetic Leather

### „Stamskin® One“ Synthetic Leather

Macchiato

Designed to resist the harshest environments (outdoor, medical, contract, yachting, etc.), Stamskin One offers exceptional technical qualities and a unique finish.

Stamskin One ensures even easier cleaning and disinfection thanks to Elastomère Serge Ferrari technology. This specific formulation is insensitive to oils (massage oils, sun cream, etc.), body fluids and alcohols (detergents), and also offers improved breathability.

## The Right Cover for Your Gharieni Bed.

Exquisite terry products indicate, that you place great importance on comfort in your massage studio or Spa. First-class production guarantees the exquisite design, perfect manufacture and - of course - high quality materials of our compress cloths, facial cleansing cloths and towels as well as of our upholstery-covers. The selected material convinces through its comfortable grip, extreme absorbency and wonderful, comfortable skin sensation. In addition, the fabrics and covers including their borders and logos will keep form and size. Top quality colouring guarantees demanding colour nuances of highest quality and stability.

As we provide these offers you can take advantage of receiving cloths/towels and covers as well as velour cloths and cotton sheets from a single source.

So, not only the quality is right! Moreover, the coherent presentation of your Spa/institute is enabled. Please use our Wellness- & Medical-Accessories Catalogue to receive further information about our terry products.

Our covers, which are specially-manufactured for our patient chairs, will perfectly protect your working devices from dirt and heavy use. Due to the high-quality material machine laundry (max. 60° C) for hygienic cleaning is thus possible. Internal elastic bands keep the single sections exactly in the right position. All functions of the treatment bed will continue working.

Our covers are available in three different colours: White, Choco and Crème.

It would be best if you order the relevant cover when purchasing the treatment bed. Our team will be happy to advise you.

# Treatment Beds

ILG9CJW6UC R6Q2

Chiropody

Medical

Physio Therapy

The Gharieni cosmetics beds are both functional and flexible. The sitting surfaces are multi-adjustable and can be controlled with a hand-held switch. Depending on the model of bed, up to eight positions can be saved using the memory function. The high quality actuators from Linak are equipped with the "Spline" safety function which prevents the risk of crushing on moving parts. With non-motorised bed parts, Stabilus gas pressure springs ensure simple adjustment with little effort.

The design of the beds was configured taking ergonomic factors into account. Numerous well thought out details such as the optional Rotonde turning function make working easier. The extendable head and foot sections offer comfort to customers of all body size. The spa beds are fitted with white Gharieni synthetic leather upholstery as standard. In addition to the standard equipment you are also able to choose from a wide range of colours here. These are provided on the back cover of the catalogue. Select your favourites from the Gharieni colour palette or from the exclusive Ferrari Stamskin Top Collection! On some models of beds you can combine up to three different colours for your personal bed.

The casing is made out of robust, easy care and colour-fast plastic. On almost all models it is available both in the standard white and also in titanium.

You can view the options available for configuring your bed in the options table for the corresponding beds. Please find explanations of the individual options on the back cover of the catalogue. You can find an extensive list of accessories at the end of the relevant bed section, and in our „Wellness & Medical Accessories“ catalogue.

Hygiene - Collecting Device  
(for SL & SPL Podo)  
Practical accessory for your Podo treatment bed. A collecting device is installed instead of the telescopic foot rest - either as a standard factory installation or as an add-on kit available. The collecting device can be removed at any time so you can reinstall the foot rest. Especially useful, hygienic and time-saving when working with the „wet“ method. 40 hygiene-bags are included.  
**Art. 42063** -,--

40 hygiene-bags  
**Art. 42060** -,--

Footrests for Podiatry Chairs  
as an alternative to the standard foot parts // cylindrical shape // enables numerous support options // suitable for almost all Gharieni podiatry chairs (except PLS)

# K10 Furniture Series

## Gharieni K10 Furniture Series

The new furniture series K 10 is the innovative further development of the successful K 9series. K 10 is designed as a modular system with a gap-free surface, which covers the single elements and encloses them like a frame. The K 10 series provides a perfect and aesthetic organization system for your treatment room.

The basic module is available in three variants relevant to your needs and the size of your treatment room: for two, three or four individually customised built-in modules with a width of 107 cm to 207 cm (81.5 in). You can also choose the built-in modules - a drawer module, a cabinet module and a base cabinet module - relevant to your needs.

Furthermore, a particularly practical feature is the perfectly integrable treatment unit Spa Trolley HST K 10-Module. This module is equipped with soundless low-friction rollers and can easily be pulled out for treatment and closed after treatment. The Spa Trolley HST is equipped with a stowable evaporator incl. herb-apparatus. The integrated FDS (Foam Detecting System) switches off the evaporator if any foaming caused by contamination occurs; moreover, the arm of the evaporator is pivotable.

This module also provides a large storage space, a telescopic tray, a drawer and a compartment with integrated Hot Cabi. Furthermore, it is equipped with a storage compartment for the magnifying lamp Flex and a holder for the lamp. The base modules and built-in modules are - of course - available in many noble decors suitable for a perfect presentation in your institute. The installation of an additional basin is also possible.

### Gharieni K10 Furniture Series

available in three versions: incl. 2, 3 or 4 modules // individually customised built-in modules // optional available in many different decors // also available as a wash-stand base cabinet // installation of a worktop washbasin is possible

Für jeden das passende Design

All the prices of these high quality, elegant designer modules apply to the white or wenge décor. It is also possible to optionally choose from over 50 additional wood and colour décor in matt or high gloss varnish and thereby find the suitable visuals for the corresponding practice. The chiropody system is especially elegant in the new „Ebony“ wood décor, for instance, a modern gloss wood visual effect.

## Alfa Air QUANTUS

A quantum leap in suction technology

Higher, faster, further - this is the principle in the area of sports. This means, when applied to pedicure: quieter, stronger, lighter. The new Alfa Air Quantus combines each of these skills.

### QUIETER

The appliance is one of the quietest ones (only 52dBA) on the pedicure market. You have to listen twice to find out whether the appliance is operating.

### STRONGER

Operating with brushless micro motors, the appliance provides 5,000 to 30,000 resp. 40,000 rpm optimum torques. No „slipping“ of the milling, no „sticking“ of the micro motor even at low speeds with a bigger milling diameter.

Moreover, the brushless suction motor provides both a long service life (therefore 3 years guarantee) and an efficient suction capacity.

### LIGHTER

The appliance is a real „lightweight“ as it is not equipped with heavy turbines for the suction due to its revolutionary suction technology. This weight advantage provides much joy with regard to mobile pedicure and reduced workload in particular.

## Alfa Air QUANTUS 50

from approx. 5,000 to 40,000 rpm // connectible LED-illuminated handpiece // adjustable light intensity // LED-lighting in the back section of the handpiece for identifying standby-mode // big touch-display with indications of each function // suction filter control-system // combined memory functions (suction and rpm) // standby-switch on handpiece // steplessly-adjustable rpm-control // clockwise/anticlockwise rotation // quiet and smooth-running operation // power of brushless suction-turbine: 50 W // max. 52 dBA // volume of dust bag: approx. 296 cm<sup>3</sup> // weight of the appliance: approx. 2.8 kg (6 lbs)

height: 14 cm // width: 28.4 cm // depth: 26.5 cm

height: 5.5 in // width: 11.2 in // depth: 10.4 in

Art. 33195

,-,-

### Alfa Air QUANTUS 30

from approx. 5,000 to 30,000 rpm // suction filter control-system // LED display of each function // membrane keypad with soft-key operation // memory functions (suction capacity and rpm) // brushless micro motor // LED-lighting for identifying standby-mode // standby-switch on the handpiece // steplessly-adjustable rpm-control // clockwise/anticlockwise rotation // quiet and smooth-running operation // power of brushless suction-turbine: 50 W // max 52 dBA // weight of the appliance: approx. 2.8 kg (6 lbs)

height: 14 cm // width: 28.4 cm // depth: 26.5 cm

height: 5.5 in // width: 11.2 in // depth: 10.4 in

**Art. 33190**

---

### Alfa Spray QUANTUS 40T

Integrated INTRAMatic spray guide // new medicine pump technology // Ergonomically shaped, lightweight handpiece // 40,000 rpm // 3 infinitely dimmable LEDs on the handpiece // standby switch for all functions on the handpiece // brushless micro motor // touch display // memory function (memory for speed & spray intensity) // dynamic adjustment of the stroke length (spray) by software control

height: 14 cm // width: 28.4 cm // depth: 26.5 cm

height: 5.5 in // width: 11.2 in // depth: 10.4 in

**Art. 33200**

---

Art. 33148

### Hybrid AirSpray Pro 40d

from approx. 2,000 to 40,000 rpm (both handpieces) // steplessly-adjustable rpm-control // clockwise/anticlockwise rotation // motor and spray intensity separately-adjustable // quiet and smooth-running operation // volume of container: approx. 400 ml // max. suction capacity: approx. 600 litres/min. // max. 68 dBA // volume of dust bag: approx. 250 cm<sup>3</sup> // weight of the appliance: approx. 5.1 kg (11 lbs) // spray-handpiece with 3 LEDs // adjustable light intensity

height: 15 cm // width: 32 cm // depth: 23 cm

height: 5.9 in // width: 12.6 in // depth: 9.1 in

Art. 33148

---

### Alfa Spray Pro 40d

from approx. 2,000 to 40,000 rpm // steplessly-adjustable rpm-control // clockwise/anticlockwise rotation // motor and spray intensity separately-adjustable // quiet and smooth-running operation // volume of container: approx. 400 ml // weight of the appliance: approx. 3.5 kg (8 lbs)

height: 14 cm // width: 27 cm // depth: 18.5 cm

height: 5.5 in // width: 10.6 in // depth: 7.3 in

We have designed a new device series especially suitable to be used in treatment cabins relevant to the increased demands of the continuously changing pedicure market. To ensure maximum noise reduction is the most important characteristic for appliances to be used in studios or wellness-facilities.

Such an appliance is equipped with a low-noise suction motor (below 60 dBA) while providing optimum suction capacity. The appliance is available in three versions:

#### Alfa Air Pro 40ds1

from 2,000 to 40,000 rpm // steplessly-adjustable rpm // hand-piece with integrated suction and deactivation // clockwise/counter-clockwise rotation // 4 memory functions (for suction capacity and rpm) // membrane keypad with big display and operating hours counter // additional USB-port for a small lamp or cell phone with USB-port // each appliance with USB-port is applicable // brushless micro motor with handpiece incl. light // sufficient illumination of the milling area by integrated LEDs // the light is connectible // power of the suction turbine: up to 300 W // suction capacity: 730 litres/min. // max. 62 dBA // volume of dust bag: 296 cm<sup>3</sup> // weight of the appliance: approx. 4.0 kg (9 lbs)

height: 12.5 cm // width: 32.0 cm // depth: 22.0 cm

height: 4.9 in // width: 12.6 in // depth: 8.7 in

#### Alfa Air Pro 40ds1 // Art. 33185
