# MLX 13DOME

TRIPLE DETOX

# MLX i<sup>3</sup>Dome

WELLNESS BENEFITS

Significant improvement in wellbeing

Supports the reduction of negative stress and depression symptoms

Promotes detoxification

Dramatic sports recovery

Supports the metabolism

# MLX i<sup>3</sup>Dome

## EVIDENCE BASED

Unexpected research findings following treatment in the Gharieni MLX i<sup>3</sup>Dome, lead the way for integrating the Fitness workout and Spa experience in the guest journey.

Continuing its commitment to Verified Wellness, the Gharieni Group, announces the results from the first part of a continuing series of studies, on the proven benefits of the MLX i<sup>3</sup>Dome. This quantifies improvements in muscle recovery and wellbeing after treatments in the MLX i<sup>3</sup>Dome – following a workout.

These new scientific studies, for the Wellness industry, look at how this Gharieni Wellness technology bed dramatically cuts the recovery period for muscles after physical exercise while substantially improving a sense of wellbeing for the individual.

The study, "The Impact of Acute Exposure to MLX i<sup>3</sup>Dome in Recovery After Intense Exercise: Effects on blood and muscle parameters, sport performance and wellbeing", published in May 2021, examined how the Gharieni MLX i<sup>3</sup>Dome was instrumental in:

- Decreasing muscle soreness
- Improving blood pH
- Improving wellbeing

The study, "The impact of chronic exposure to MLX i<sup>3</sup>Dome on people under stress", published in October 2021, examined how the Gharieni MLX i<sup>3</sup>Dome was instrumental in:

- Effects on body detoxification
- Improving immune function
- Improving mood state

**Wellbeing**  
The wellbeing levels assessed over three days, immediately after the 30 min recovery period, showed no change in the G-control condition. However, the wellbeing tended to increase day by day in the G-i3dome group (Fig11). Moreover, wellbeing evaluated on Day+1 and Day+2 was significantly higher in the G-i3dome group compared to the G-control group.

## THE ULTIMATE DETOX

### Far Infrared (FIR), Plasma & Light Treatment

MLX i<sup>3</sup>Dome is a next generation detoxification treatment that integrates three highly effective detox methods into one by combining Far Infrared technology, Plasma, and Light treatment.

#### Re-charge your batteries & detox

While the Gharieni FIR-technology supports the metabolism and the perspiration of the body with long-wave infrared rays through the MLX iDome, the additional Plasma- and Light-Technology device (PLT) at the head section provides visible skin rejuvenation and detoxification.

Using the three technologies in such a well thought-out combination is much more effective, as all three support and multiply the results of all individual treatments.

#### Touchless

The Gharieni MLX i<sup>3</sup>Dome works as a stand-alone treatment, where no therapist is required. After the client is positioned on the MLX iDome with the PLT device, no hands are necessary to support the treatment session.

# FAR INFRARED TREATMENT

Gharieni FIR technology stimulates the body with far infrared rays

First discovered by scientist Sir William Herschel in 1800, Far Infrared Rays (FIR) are the healthy rays contained in sunlight that are responsible for photosynthesis, the process used by plants to produce energy and without which, there would be no life on earth. Approximately 80% of solar energy is made up of FIR and 60% is between the range of 10-20 microns. Far Infrared Rays are invisible wavelengths of light that are longer than that of visible light.

Benefits include:

- sports recovery
- mental fitness and general wellbeing

# PLASMA TREATMENT

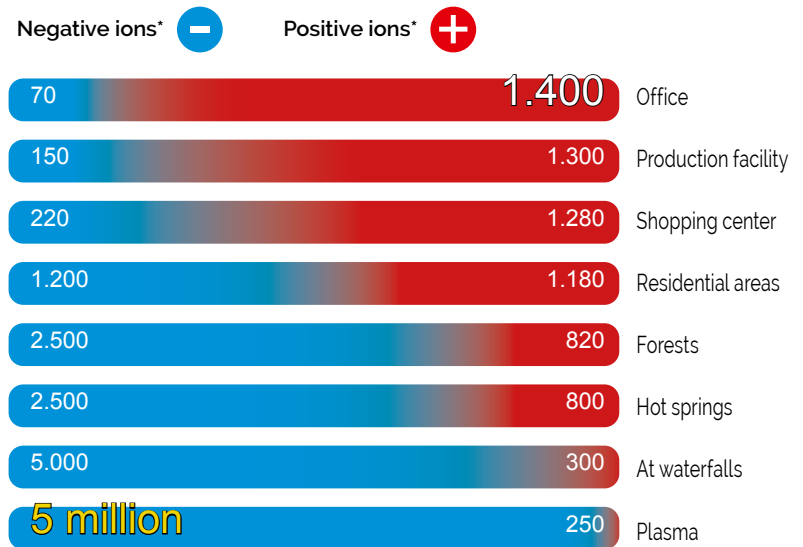

For problem-prone skin, anti-ageing and revitalization

Plasma Technology is an innovative method for cosmetic treatments. During the application, clients are exposed to the energy of oxygen (O<sub>2</sub>) in the form of applied electrically negatively charged ions.

Benefits include:

- Maintenance of skin health
- Visible improvement of sensitive skin
- Increase of vitality & suppleness
- Positive support of the metabolism

The more Negative Ions the better

\*Number of positive and negative ions per cm<sup>3</sup>

# LIGHT TREATMENT

Scientifically proven and effective

Light treatment has been known for a long time and has been successfully used for decades. The effect of the colored light is reinforced by the negative ions.

## **RED light:**

Revitalizes, activates blood circulation, energizes, promotes vitality and creativity.

## **GREEN light:**

Harmony and regenerative, hopeful, soothes, creates balance within the rhythm of life.

## **BLUE light:**

Celestial and peaceful, cooling, calming, quieting, and cleansing.

# MLX iDome

## Features:

- Available as iDome with Gharieni FIR technology or i3Dome with FIR technology and Plasma Light Technologie (PLT)
- Dome pneumatically adjustable with 2 gas lifts
- Lying surface height adjustable and inclinable at electric version
- Also available as Static model without lying surface adjustment
- Spacious drawer
- Standard upholstery color: White. Other colors from our Stamskin color collection at extra charge
- Base available in many decors (option)
- Including lying surface extension and neck pillow

## Gharieni MLX iDome Static

- Static table surface height: 54 cm (21.3 in)
- Length: 225 cm (88.6 in)
- Width overall: 90 cm (35.4 in)
- Table surface width: 70 cm (27.6 in)
- Load capacity of the table surface: 350 kg (770 lbs)

## Gharieni MLX iDome Electric

- Adjustable surface height: 54-94 cm (21.3 – 37 in)
- Length: 225 cm (88.6 in)
- Width overall: 90 cm (35.4 in)
- Table surface width: 70 cm (27.6 in)
- Lifting capacity: 300 kg (660 lbs)
- Load capacity of the table surface: 350 kg (770 lbs)
